

Tested USB flash memory list for CL, QL, RIVAGE PM series

Yamaha Corporation

A USB flash memory can be used for saving/loading data and updating the firmware on Yamaha M7CL, LS9, CL, QL series mixing consoles. In addition, audio files such as MP3 can be recorded/played back.

These functions require the following USB flash memory specifications.

- The maximum capacity is 32GB.
- The compliant format is FAT16, or FAT32.

Some USB flash memories may not work properly on the consoles.

As a guidance to select a compatible USB flash memory, we have tested tens of commercially available memories and provided this list of qualified ones. However, please note the following points.

- The list is a result of a few basic tests. Please note that we assume no responsibility whatsoever for any damages resulting from the use of the USB storage devices listed in the “Compatible list”.
- With respect to the USB storage devices listed in the “Compatible list”, there is a possibility that the specifications of the devices may be changed by the manufacturer, which may cause incompatibility.
- Please refer to each manufacturer's documentation for detailed specifications on each USB storage device.
- The listed devices have passed the following basic tests.
 - Load function check
 - Save function check
 - Playback function check
 - Recording function check
 - Firmware update function check
- Information in this document is subject to change without notice.
