## New Functions in YC Version 1.30

The following functions have been added to the YC88 / YC73 / YC61 due to the firmware version upgrade. This manual describes additions and changes with respect to the Owner's Manual that came with your instrument.

- A new Vibrato/Chorus effect has been added to the FM Organ Voices.
- A new Pan setting has been added to the Live Set Sound settings.
- A new function that allows simultaneous changing of parameters in the Keys Section has been added.
- A new function allows maintaining the rotation speed of the rotary speaker effect has been added.
- New Live Set Sounds have been added.
- New Voices have been added.

# New Vibrato/Chorus effects for FM Organ Voices

New Vibrato/Chorus effects are now available on FM Organ types F1-F6 of the Organ section.

F1	VIBRATO	Vibrato from scanner-based vibrato circuitry.
	CHORUS	Chorus from scanner-based vibrato circuitry.
F2	VIBRATO	Simple pitch modulation by changing only the pitch depth.
	CHORUS	Chorus from scanner-based vibrato circuitry.
F3	VIBRATO	Vibrato that changes depth and speed.
	CHORUS	Simple amplitude modulation by changing only the volume depth.
F4	VIBRATO	Simple pitch modulation by changing only the pitch depth.
	CHORUS	Single-phase chorus that reproduces analog chorus sound.
F5	VIBRATO	Simple pitch modulation by changing only the pitch depth.
	CHORUS	Flanger that changes speed.
F6	VIBRATO	Phaser that changes speed and feedback amount.
	CHORUS	Talking modulator that changes pronunciation of vowels.

When one of the Organ types F1-F6 is selected, the On/Off values of Vibrato/Chorus for both Upper and Lower will be the same.

# Additional Pan Parameter

The Pan parameter has been added to Organ Settings, Key A Settings and Key B Settings.

[SETTINGS] button → [Sound] → [Organ Settings] [Key A Settings] [Key B Settings] → [Pan]

Can be set over a range of L63 to C to R63.

With the addition of the Pan parameter, indications of "Mono/Poly" and "Portamento" have been integrated.

## Comparison of old and new tree diagrams

·V1.20

Settings

- └─ Key A Settings
  - └─ Mono/Poly
  - └─ Portamento
  - └─ FM Unison
  - └─ EG/Filter Control
  - └─ P.Mod
  - └─ Touch Sensitivity

·V1.30

Settings

- └─ Key A Settings
  - └─ **Mono/Portamento**
  - └─ FM Unison
  - └─ EG/Filter Control
  - └─ P.Mod
  - └─ Touch Sensitivity
  - └─ **Pan**

When the setting is something other than "C," a bar is displayed.

# New function that enables simultaneous changing of multiple parameters in the Keys Section

The following parameters of both the Key A section and Key B section can be controlled simultaneously: Voice, Split, Octave, Volume, Tone, EG, Filter, Effect 1, and Effect 2.

When both the Key A and Key B sections are active, pressing and holding Keys [A B] button will light the lamps simultaneously and link the parameters of the Key A and Key B sections.

The LEDs will not be lit if the Key A and Key B parameter values differ.

## New Rotary Speaker Speed parameter in Control Panel

[MENU] button → [Control Panel] → [Rotary Speaker Speed]

When this is set to "Hold", the rotation speed is maintained even if the Live Set is switched. This is useful when you want to keep the same rotation speed, even when changing the Live Set.

Set to "Change" if you want to play at the preset rotation speed of each newly selected Live Set.

### Rotary Speaker Speed Menu

Function name	Description
Change	When switching among Live Sets, the preset rotation speed for each Live Set is applied.
Hold	Even when switching among Live Sets, the current rotation speed is maintained.

#### NOTE

The initial setting is "Change."

# New Live Set Sounds

## New Functions in YC Version 1.20

The following functions have been added to the YC88 / YC73 / YC61 due to the firmware version upgrade. This manual describes additions and changes with respect to the Owner's Manual that came with your instrument.

- A new rotary speaker effect has been added.
- New FM organ types have been added.
- A new setting "FM Color Type" has been added to the "Drawbar Color" setting.
- Three EQs have been added to the effect types.
- A new setting "Touch Sensitivity" has been added to the "SETTINGS".
- The locations in the menu of "EG Control" and "Filter Control" have been changed.
- New Live Set Sounds have been added.
- New Voices have been added.

# New Rotary Speaker Effect

A new rotary speaker effect, "Studio," has been added. In addition, the conventional Rtr A and Rtr B have been renamed to "Classic" and "Overdrive," respectively.

## YC88/YC73/YC61 V1.20

Effect	Explanation
Studio	Rotary speaker with three-dimensional effect and greater sense of motion.
Classic	Standard rotary speaker for organs.
Overdrive	Rotary speaker with transistor preamplifier simulation and strong distortion.

### Rotary speaker effect settings

[SETTINGS] button → [Sound] → [Rotary Speaker] → [Type]

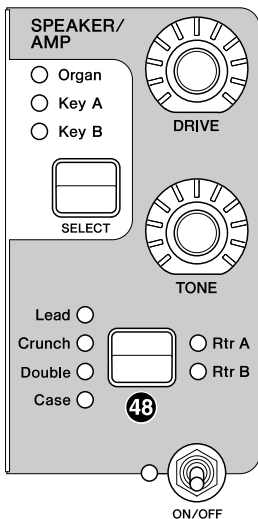

Added Rotary Speaker Type to SETTINGS.

Rotary Speaker Type can be set independently for Rtr A and Rtr B.

### Rotary Speaker Type

Function name	Description
Slot A	Sets the rotary speaker effect assigned for the Rtr A type. <b>Settings:</b> Studio, Classic, Overdrive <b>Initial setting:</b> Studio
Slot B	Sets the rotary speaker effect assigned for the Rtr B type. <b>Settings:</b> Studio, Classic, Overdrive <b>Initial setting:</b> Classic

### Selection of rotary speaker effects

If you select Rtr A or Rtr B with the **48** Effect type switch button in the SPEAKER/AMP section, you can apply the rotary speaker effect set in "Rotary speaker effect settings" above.

#### NOTE

When you select the Rtr A or Rtr B type in the SPEAKER/AMP section, you can use the [EXIT] + [TONE] knobs to directly change the "Rotary speaker effect settings" for the selected type.

# New Organ Types

New FM organ types (F4 to F6) have been added, making now a total of six FM organ types.

F1		The pure sine wave carriers make it useful for creating sounds like a pipe organ.
F2		This type consists of all square wave carriers for the operator. Suitable for creating sounds like British transistor organs.
F3		This type consists of a sawtooth wave carrier for all operators. Suitable for creating sounds like Italian transistor organs.
F4		This type has one modulator for each of the four carriers. Lowering the level of the modulator brings it closer to a square wave, and raising it increases the overtones like a sawtooth wave, creating an organ sound that is somewhere between the F2 and F3 types. The percussion sound can be turned on/off with the PERCUSSION button.
F5		Two carriers each have three modulators. By raising the level of each modulator, you can create sounds with complex overtones not found in conventional organs.
F6		This type has one modulator for each of the four carriers. Since the modulator is set to EG or LFO, increasing the level of the modulator will produce a sound with a synthesizer-like element. The percussion sound can be turned on/off with the PERCUSSION button.

## NOTE

The operator numbers for each algorithm represent the corresponding drawbars. Note that for the F4 to F6 types, the numbers (feet) displayed on the drawbar do not match the pitch of the sound.

# Additional Parameters for FM Organ Types

Added **FM Color Type** to SETTINGS—Drawbar Color.

The new FM Organ type drawbars add two attributes; in addition to the carriers, the modulators and feedback are also included. For these types of organs, the carrier will be the same color as the color set in Upper/Lower, but the modulators and feedback loops are divided into colors related to the carrier color.

## Drawbar Color

Function name	Description
Upper	Sets the colors of the drawbar LEDs. These can be set independently for Upper and Lower. <b>Settings:</b> White, Red, Yellow, Green, Cyan, Blue, Magenta
Lower	<b>Initial setting:</b> Upper = White, Lower = Red
FM Color Type	Sets the color combination of the drawbar LEDs. It can be divided into up to 3 colors according to the attributes of carrier, modulator, and feedback. <b>Settings:</b> 1 Color: Carriers, modulators and feedback are all the same color 2 Colors: Two different colors; one for the carriers and one for the others (modulator, feedback) 3 Colors: Carriers, modulators and feedback are all different colors <b>Initial setting:</b> 3 Colors <b>NOTE</b> H type organs and F1 to F3 FM organs always have the colors set for Upper and Lower regardless of the FM Color Type.

## New EQ Type

### YC88/YC73/YC61 V1.20

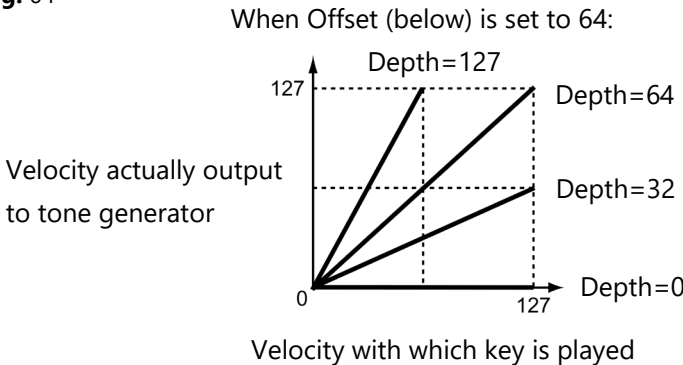

Category	Type name	Express	Description	Stereo/Mono
EQ	Tone Control	<b>E1</b>	Shelving equalizer. Use the [DEPTH] knob to adjust the low band, and the [RATE] knob to adjust the high band.	Stereo
	1 Band EQ Narrow	<b>E2</b>	Peaking equalizer with narrow Q (bandwidth). Use the [DEPTH] knob to adjust the gain, and the [RATE] knob to adjust the center frequency.	Stereo
	1 Band EQ Wide	<b>E3</b>	Peaking equalizer with wide Q (bandwidth). Use the [DEPTH] knob to adjust the gain, and the [RATE] knob to adjust the center frequency.	Stereo

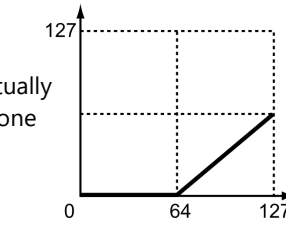

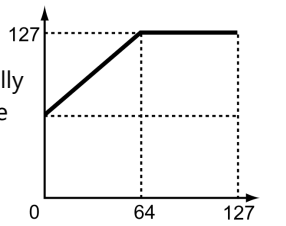

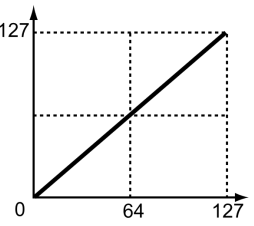

# New Touch Sensitivity Parameter

[SETTINGS] button → [Sound] → Select the voice section\* to be set → [Touch Sensitivity]  
 (\* Key A Settings / Key B Settings)

Touch Sensitivity has been added to SETTINGS, and can be set for the Voice sections of Key A and Key B.

## Touch Sensitivity

Function name	Description
Depth	<p>This parameter can be used to select how the velocities with which keys are played will affect the velocities actually output to the tone generator for the current Voice section. As shown in the graph below, the larger the value set, the greater the degree to which output velocities vary in response to changes in the playing velocity (i.e., the steeper the slope of the graph).</p> <p>If a value of 0 is set, the output velocities will be totally unaffected by different playing velocities, resulting in a response similar to that of an organ, where playing strength has practically no effect on the sound produced.</p> <p><b>Settings:</b> 0 – 127  <b>Initial setting:</b> 64</p> <p>When Offset (below) is set to 64:</p>  <p>Velocity actually output to tone generator</p> <p>Velocity with which key is played</p>

Function name	Description
Offset	<p>This parameter can be used to raise or lower all velocities output to the tone generator for the current Voice section. As shown in the graphs, 64 is subtracted from the value set here and the result is doubled to determine the actual amount by which the output velocities are adjusted. However, if the resultant output velocity is less than 1, a value of 1 is used; similarly, if the resultant output velocity is greater than 127, a value of 127 is used.</p> <p><b>Settings:</b> 0 – 127  <b>Initial setting:</b> 64</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>When Depth (above) = 64 and Offset = 32</p>  <p>Velocity actually output to tone generator</p> <p>Velocity with which key is played</p> </div> <div style="text-align: center;"> <p>When Depth (above) = 64 and Offset = 96</p>  <p>Velocity actually output to tone generator</p> <p>Velocity with which key is played</p> </div> </div> <div style="text-align: center; margin-top: 20px;"> <p>When Depth (above) = 64 and Offset = 64</p>  <p>Velocity actually output to tone generator</p> <p>Velocity with which key is played</p> </div>

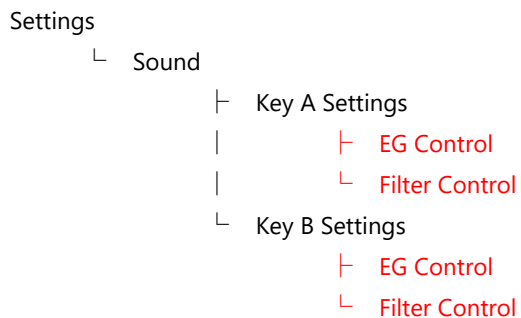

Voice sections where Touch Sensitivity has been changed from the default are displayed with a keyboard icon.

## New Functions in YC Version 1.10

Yamaha has upgraded the YC firmware, adding the following new functions.

This manual describes additions and changes with respect to the Owner's Manual that came with your instrument.

- The setting method of vibrato (CC # 1: Modulation) has been changed.
- Operability has been improved.
- New Live Set Sounds have been added.
- New Voices have been added.

# Changing the setting method of vibrato (CC # 1: Modulation)

The new "P.Mod" parameter (related to pitch modulation) has been added to pitch modulation in the settings for each Sound section of the Live Set Sound.

The "Modulation Lever" parameters "P.Mod Depth" and "P.Mod Speed," originally in the "Controllers" of the Live Set Sound have been moved to "P.Mod."

"P.Mod Initial" has also been added to "P.Mod."

With the "P.Mod Initial" parameter, the amount of change in P.Mod (CC #1: Modulation) can now be set to a value other than 0 when switching Live Sets.

If you change "P.Mod Initial" to a value other than the initial value (0), the **[MOD]** icon will be displayed on the top screen.

## Comparison of old and new tree diagrams

Settings

·V1.10

Settings

## Improved operability

To call up the Voice list, press and hold or double-click the Voice select switch on the top screen.

When you press the [Enter] button on a screen showing a parameter value, the level in the hierarchy now returns to the previous one. This allows you to set other parameters continuously. Press and hold the [EXIT] button to return to the top screen.

### **NOTE**

When you are in the MENU screen, press the [MENU] button to return to the top screen. When you are in the SETTINGS screen, press the [SETTINGS] button to return to the top screen.
